

Dear Dr. Henney,

*ARE the public so naive?!*

I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food. I request that the agency's current policies be changed, and I support all the points in docket #00P-1211\CP1

☒ All GE foods should be labeled so I am informed and have a choice.

☒ GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing

☒ There should be a moratorium on GE foods until long term studies show they are safe for human health and the environment

(Additional Personal Comments:) *How can we be*

*so foolish as to unleash a technology with such unlimited potential to do good as well as BAD of such magnitude?*

Name *Ben Gause*
